3. Authorization for this examiner's amendment was given in a telephone interview with Mr. Pranay Pattani on August 13, 2010.

Allowable Subject Matter

4. Claims 1-8 and 10-14 are allowable over prior art.

5. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on Amendment filed on June 2, 2010:

As in claims 1, 6 and 10, the prior art of record fails to teach or fairly suggest an information recording carrier having following feature:

A controller calculates the similarity value between environmental variables at present and acquired environmental variables stored in the reproduction history storage means based on the equation:

$$S_n = W_c * 4\sqrt{((x-x_n)^2 + (y-y_n)^2)} + W_m * |m-m_n| + W_t * |t-t_n| + W_p * |p-p_n|$$

where S_n is the calculated similarity value, W_c is a weight factor of location, x is a present longitude, X_n is nth history

Art Unit: 2627

of longitude, y is a present latitude, y_n is nth history of latitude, W_m is a weight factor of time, m is a current time, m_n is nth history of time, W_t is a weight factor of temperature, t is a current temperature, t_n is nth history of temperature, W_p is a weight factor of pressure, p is a current pressure, and p_n is nth history of pressure.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
